

PRESSURE GAUGE OPERATION MANUAL

PRESSURE GAUGE

Model:

GP-GG-PG-001

Application:

This gauge is used to measure the pressure inside the aerosol canister after the propellant filling process.

Measuring method:

Refer to Figure 1 and 2, insert the stem of the aerosol valve into the plastic adapter of the gauge. Read the pressure as shown in the gauge. Take special care when releasing the stem from the adapter as product inside the aerosol canister may spill out.
